

# Fish Feeder

Step 1: I'm going to hit a Ping Pong Ball with a ping pong paddle at a bunch of dominos.

Step 2: The dominos will fall over and knock the soccer ball down the Incline Plane.

Step 3: The soccer ball will roll down the Incline Plane which will hit a toy car.

Step 4: The toy car goes forward which connects to a string which was part of the pulley.

Step 5: The other side of the pulley has a string attached to a plank.

Step 6: When the car pulls the string to one side, the other side will detach the fish food.
